

INVESTMENT PHILOSOPHY

We grow our wealth through long-term ownership of great businesses that thrive. Every winner in any industry needs to be data-driven and have superior software in its core. The digitalization of the world is causing an unprecedented shift of wealth within society.

Over the next decade, enormous fortunes will be made in the areas on which we are focused. Our mission is to let our investors participate in the winners of our time.

We combine a value investing mindset with a venture capital vision to zoom in on exceptional businesses. Is the company growing its competitive advantage? Is it self-financing? Do we admire management? Is the capital allocation intelligent? Is the price we pay to become co-owners fair?
